In granting the additional amount, each percentage point from the additional votes received shall be taken into account until the second position behind the comma.

The contribution, determined as per the previous paragraphs, cannot exceed 75 percent of the global revenue of the central structure of a political party. It is for the respective political party to demonstrate the burden of proof.

If a political party no longer meets the terms stipulated in paragraph 1, it shall lose the benefit of public financing starting with the subsequent financial year.

Art. 3. The official results of the elections proclaimed by the president of the main offices or of the main office of the constituency represent the basis for computing the contribution.

The changing of a party’s designation during a legislative period does not affect in any way the granting of the contribution.

In case of the dissolution of a political party, the contribution is ceased starting with the first day of the month following the dissolution.

In case of an alliance of several political parties into one structure, the contribution is paid into an account of the said structure. The internal allocation shall be the responsibility of the structure.
